

David Joined Old Hall Performance with Red Line Synthetic Oil but soon realised the benefits of Flowmaster Mufflers. The discipline David competes in is drifting, a spectacle where showmanship is everything, drivers put it all on the line to impress a panel of judges. Drifting requires drivers to stand out and David's Dodge Viper V10 equipped Nissan certainly dose that especially as its fitted with two Flowmaster Super 10 Mufflers!

Flowmaster mufflers provide David with a distinct sound that is instantly recognisable, The technology of Flowmaster mufflers allows the big 8.0 litre V10 to breathe and by creating negative pressures in the exhaust, increases power. Sound restrictions are a growing concern in every form of motorsport but now with Flowmaster you don't have to compromise.

We offer both chamber and laminar flow mufflers from the Flowmaster range, to see what best suits your vehicle or to inquire about stocking Flowmaster in your shop please contact Simon: .
